

Athens Plastic Surgery Center: Skin Resurfacing

Laser Skin Resurfacing

Procedure: Laser Skin Resurfacing

Purpose: To reduce signs of aging, improve overall appearance of skin

Time in surgery: varies

Time off from work: varies

Laser skin resurfacing is used to improve the appearance of the skin by removing the outermost layer of skin with laser energy. Laser resurfacing is effective for wrinkle reduction as well as an improvement in the overall appearance of the skin to result in a fresher, younger look.

Chemical Peel

Procedure: Chemical Peel

Purpose: Correction of uneven pigment, wrinkles, sun damage, etc.

Time in surgery: varies

Time off from work: varies

Chemical peels restore a more youthful appearance to the skin by peeling away the top layers of the skin. The peel is an option for non-invasive facial rejuvenation.

Injectable Fillers

Procedure: Collagen/ fat injection

Purpose: Lip enhancement, wrinkle filler

Time in surgery: Varies

Time off from work: Usually none

The injection of collagen or fat to enhance lips or fill wrinkles is an office-based procedure which produces immediate and dramatic results. These fillers are used to restore a more youthful appearance.
